

Overview Educational Content

This page provides an overview of the **Open Educational Resources (OER)** usually included in a Labdoo laptop. You can download all the content described below from the Labdoo FTP service:

<http://ftp.labdoo.org/download/install-disk/> or find it on a previously cloned Labdoo computer at /home/labdoo/Public/wikis or in the folder /home/labdoo/Public/xowa/wiki.

Links to content in several languages: [English](#), [Spanish](#), [French](#), [German/Deutsch](#), [Arabic](#), [Hindi](#), [Bahasa Indonesian](#), [Nepale](#), [Portuguese](#), [Kiswahili/Swahili](#).

Most educational content was taken from different sources in the web. Depending on language and size of disk-drive you are able to choose and install the best fitting image for cloning.

Preparation

- Create a folder if you haven't, according to the language(s) you need, e.g. /home/labdoo/Public/wikis/**EN** for English and so on
- Download the index-file from and into the language folder you are working on, e.g. /home/labdoo/Public/wikis/**EN/index-en.html**
- Open this index-file in a tab using the browser of your choice, e.g. Firefox, and save the tabs in its settings, so someone can open it and show it to the students at a school when starting the browser.

Download archive(s) and unzip to content folder

- Download and unzip the archive(s) to the folder /Public/wikis/xx (xx = language code, e.g. EN, DE, FR, ES etc.) with the user: Labdoo. You can download the archive(s) you need by right-mouse clicking and selecting "Unpack to"
- Unpack and delete the archive once it is unzipped.
- If you run several installations please save the archives on a local server or external USB disc drive, so you do not have to download each time each file again.

Index file(s) for an easier access

Labdoo prepared an index file for each language. You will find them in each language folder on our FTP server. Copy them into the local language folder on your laptop and the folder "Public".

Due to the amount of the content, you have to pre-select the content you are about to install and maybe discuss with the school or project partner which content suits best. Another option is to copy the archives to an external device and the traveler/dootripper takes it to the school, so they can decide on-site which content suits best.

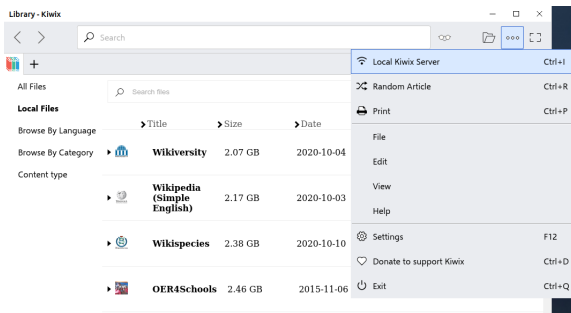

Wiki/Content folder <http://ftp.labdoo.org/download/install-disk/wiki-archive>

Use program ...	to access content (symbols in the tables below)
	content access via Firefox browser. Download more content here http://ftp.labdoo.org/download/install-disk/wiki-archive/wikis/
	content access via Kiwix tool (since end of 2020). Within Kiwix you can download more wikis. Mind your disk-size :)
	content access via Kolibri tool (pre-installed since 2021; Kolibri settings and downloads by user)

 <p>Xowa</p>	<p>content access via Xowa tool (til autumn 2020)</p>
-----------------------------------------------------------------------------------------------	-------------------------------------------------------

Spread content by Kiwix to tablets or mobile phones in a network in 3 steps

1. Start the local kiwix server

2. Start the local kiwix server

Local Kiwix Server
Starting a server allows other computers in the local network to access your Kiwix library with a standard web browser.

3. Use IP address to connect tablets or phones

Local Kiwix Server Settings - Kiwix

Local Kiwix Server
The Kiwix Server is running and can be accessed in the local network at :

192.168. . :8181 [Open in browse](#)

[Start Kiwix Server](#) [Stop Kiwix Serve](#)

Resources for teacher

[UNESCO's IICBA Electronic Library \(Teachers' resources\)](#)
