

When you receive one or multiple Labdoo laptops, please **do not** reinstall Windows, but **stay with the installed operating system (OS) Linux**.

## Here are the reasons why:

- Linux is 50 - 100% faster than Windows. Reinstalling Windows will make the laptop(s) very slow.
- From more than 80,000 free Linux apps, Labdoo includes 300 of the best educational programs.
- Labdoo installed on your laptop more than 1'000'000 ebooks, video tutorials and wiki pages in local language(s) for you - a huge library.
- Linux comes with a complete and free Office Suite, similar to Microsoft's WORD, EXCEL, POWERPOINT etc.
- Linux is practically invulnerable to viruses, which makes your system much more secure.
- Windows operating systems (XP, Vista, Windows 7) are no longer updated/maintained by Microsoft when they reach the end of their life cycle. Linux instead is up-to-date, patched, secure and LTS (**Long Term Supported**).
- Labdoo runs a **Global Support** program (LGS) which will only be helpful to you if you are using the Labdoo Linux based software.
- You will find Labdoo video tutorials on each desktop in the videos folder.
- Sophisticated user concept for teacher (labdoo), student and guest.
- If Windows is needed urgently try the pre-installed Virtualbox tool to run Windows as a VM Virtual Machine.
- and the best of all, the look & feel is like you are used to!

The screenshot shows a Linux desktop with a sidebar of application icons. A terminal window is open with the command `installscript.codecs.sh`. The main window is a Mozilla Firefox browser displaying the 'Wikipedia Selection for Schools' website. The website has a blue header with the title 'Wikipedia Selection for Schools' and a 'Checked Content' badge. Below the header, there is a 'WIKIPEDIA FOR SCHOOLS' logo and a list of subjects: Art, Business Studies, Citizenship, Countries, Design and Technology, Everyday life, Geography, History, Information Technology, Language and literature, Mathematics, Music, People, Portals, Religion, Science. A 'Title Word Index' section is also visible. The main content area contains a welcome message and instructions on how to navigate and download content. A 'Download' button is prominent at the bottom left of the website content.
